

Hello there lovely people of Camp Wasaga

Last year, shortly after fall supper camp Wasaga was the victim in a string of robberies in the area, In short words they cleaned us out. Although the event was completely heinous and extremely inconvenient it allowed us to take a moment to step back and reprioritize what is important in terms of the maintenance of our 5 gorgeous acres on the shore of clear lake. For years camp has sustained itself mostly with used equipment donated from campers, which was fantastic and let us run inexpensively for a very long time. I can proudly say that with this clean sweep of our equipment we have been updated to some of the most efficient and safe tools available on the market and what I want to stress is the importance of sustaining this for years to come. Camp Wasaga doesn't exactly have a major league team of landscapers and masters of the janitorial arts that keep the place going, we rely very much on volunteers and help from campership, which translates to a lot of people who are inexperienced, underaged or have never had to do anything like this before. Having well maintained, easy to use, and most of all safe tools at our disposal not only makes it easier to keep Wasaga beautiful for another 50 years, it creates time for mentorship and the transfer of knowledge on how to use these tools properly and create the next generation of Wardens of our land.

So with that being said, there is lots to do to get camp ready for the 2024 season and even more to do to upgrade our facilities for the next generation of Campers. This year I vow to have the biggest and best Camp Wasaga May long work weekend that we have had in recent memory, and I invite you all to join if you are ready to give some elbow grease and have a open mind to learn what it takes to thrive in riding mountain

Thank you for your time
Morgan Fiks
